

World Water Day 2026

Krishi Vigyan Kendra Cuttack celebrated World Water Day on March 22, 2026, at KVK campus, Santhapur emphasizing the importance of water in everyday life. Dr Dillip Ranjan Sarangi, expert on Soil Science described the essence of water for plants and animals along with its role in maintaining production and productivity. He also emphasized the role of empowering women for judicious use of water. Dr Ranjan Kumar Mohanta, Senior Scientist and Head, KVK Cuttack emphasized on how water is essential from the beginning of life to everyday needs. It is unbelievable to imagine life without water. Hence, a judicious use of water for irrigation, everyday needs and climate smart varieties along with water smart technologies like drip irrigation, sprinkler irrigation and sensor based smart irrigation technologies will help us conserve water for our posterity.
